

Point of Sale Systems

Nash Finch offers open, flexible and cost-effective POS solutions to meet the changing needs of the retail grocery industry. Our POS solutions provide flexible hardware and software, open system, client/server architecture and room for expansion.

Back Office Solutions

Nash Finch selected back office solutions provide strategic pricing and inventory management that enable grocers to increase top and bottom lines by turning decisions into action. Our back office solutions automate complex pricing strategies and inventory management processes. Retail customers gain competitive advantage in their markets, while growing top-line revenues and improving gross profits.

Signs & Label Printing

Nash Finch complete solution takes accountability for all the pieces required to create and print shelf talkers, labels, and signage. Nash Finch has partnered with best in class solutions that can create labels or signs from your POS file.

Time & Attendance

Nash Finch's powerful time and attendance solutions automate the error-prone, manual processes related to tracking employees' time and applying complex pay policies. You will be able to track labor at all retail levels: Organization, team, position, or employee; then deliver this information directly to managers in real time.

Image Tags

Nash Finch Image Shelf TagsSM provides unmistakable product, price and placement identification. By upgrading your shelf tags to include color product images, your store will experience less Out-of-Stocks and stocking mistakes. Your restocking and reset times will decrease significantly. Employees will have more time to concentrate on what's important - the customer!

Debit, Credit, EBT & Gift Card Services

The retail business is competitive and getting tougher every day. To maximize your sales and profits, you need to offer payment options that are fast, flexible and cost-efficient. Nash Finch combined corporate and independent transaction volume to provide our valued customers the best rates possible for processing all electronic fund transactions.

Web Services

Nash Finch suite of services include website strategy and development, online promotions; online shopping systems, location, advertised items; coupons, job openings and much more.

Professional Services

Do you have the knowledge to make informed decisions that drive business value? Nash Finch has built a team of professionals in the grocery and retail technology industry. Our team has experts in business/strategic planning and is knowledgeable in past, present and future technology. Our team can offer assistance at any level of technology, from basic POS systems to complete store integration.

Nashnet

Consider how Nashnet would enhance your communications and improve performance. Technology is key in improving the way you do business. You can be connected from the office, from home – anywhere you have internet access. Nashnet provides you with supply chain efficiency through out a host of internet services customized for you store.

Electronic Price Maintenance Service

Nash Finch Host communication provides a cost-effective means to maintaining an accurate in-store scanning item file. Lower labor costs and decreased price discrepancies are some of the benefits of electronic file maintenance. Additionally, hosting item cost information to your back office will enhance the reporting and management of your scanning system.

Help Desk and Maintenance Services

Nash Finch Help Desk in combination with our Retail Services team can drive problem resolution with a single point of contact. Our Help Desk effectively assigns an incoming issue to a specialist who drives the issue to resolution. Additionally, the Help Desk tracks all retail issues as they cycle to resolution with history and supported documentation.

Shrink Trax/ Shrink Defender

Nash Finch has partnered with TRAX to bring you Shrink Defender. Shrink Defender brings together the resources of Nash Finch and Trax to offer a thin client shrink management tool. Shrink Defender allows our retailers to manage and analyze all potential sources of POS related shrink. Shrink Defender will cut shrink, increase cashier productivity, decrease turnover and improve customer service.

Retail Services

One of the key services Retail Services can bring to retail is answers for new and emerging technologies; what is available, when to integrate, what to integrate, what is really needed by an individual retailer? To effectively run the business, automation will be part of every successful strategy going forward. We carefully analyze all emerging technology for functionality, stability and value. Via our standards we can insure that when we offer an application through our retail group it has been tested and will easily integrate into the existing applications in-store.

To assist you at retail, Nash Finch has built a team of professionals in the grocery industry. Our team has expertise in business and strategic planning as well as past, present and future technologies. Nash Finch can offer assistance at any level in your organization. Inside is a list of services you can choose from to start planning your specific strategy effectively.
